Dear Partners and Colleagues,

Education is the key to a better future, which is why parents often invest so much into their children's education. Our goal is to help students fill in any gaps in their learning, to assist them while expanding and reinforcing their skills and knowledge through appropriate training methods. To accomplish this, Klett Lerntraining develops reference and practice materials for students of all age groups – from kindergarden to K12.

The need for quality education and training material is equally present in every country around the globe. Learning is not restricted to the classroom and both students and parents achieve the best possible education by using our learning materials.

We invite you to experience the diversity of our program for your publishing house.

Simply send us an e-mail and request a book that interests you as a free sample or visit us at the most important bookfairs such as Bologna, London, Beijing and Frankfurt. Please see the dates on the backcover. We will be pleased to see you there.

Best regards,

Ulrike Keppler
Head of Foreign Rights and Co-Productions

FIRST READING

Amount of text, illustration and line length fit perfectly for 1st/2nd grade

Information and question boxes about exciting topics

Checking the comprehension of the text in a playful manner with the „Reading-Hunt through the Zoo“

Book
15 x 22 cm / 48 pages

Four Friends and a Secret
ISBN 978-3-12-949482-0

Zoo of the Magical Animals

For 1st/2nd grade

Four Friends and a Secret

In a quiet way, like a match being just lighted, a shooting star is falling down in Glücksstadt Zoo. Because of their curiosity, Erik the little lion, Lana the kangaroo, Kim the penguin and Anton the monkey can't stay in their enclosures any longer. There must have happened something mysterious! Then the animal keeper Carrot comes for the night feeding. The young animals take the opportunity to slip through the open door into the outside ...

A Kangaroo in the Classroom

Tino is shy and blushes really fast. As there is a presentation of animals in his class, therefore nobody wants to be in his group. When the four young animals Erik, Lana, Kim and Anton hear about that, there is a plain idea: They need to help Tino! Kim the penguin has an idea: Lana the kangaroo girl shall accompany Tino to school. Thus an animally lesson starts ...

A Kangaroo in the Classroom
ISBN 978-3-12-949516-2

Veterinary Doctor Penguin

With the help of his good ears Erik the lion eavesdrops on little Tino in his children's room. Tino's hamster is ill and it doesn't want to eat anything. Immediately Erik's friend Kim the penguin concocts a magic medicine. Can the miracle medicine rescue the hamster? And can the clever penguin help even more ill animals?

Veterinary Doctor Penguin
ISBN 978-3-12-949517-9

The Secret Treasure in the Zoo

The Glücksstadt Zoo urgently needs some money. That's why Anton the monkey shall be sold. Erik the little lion, Kim the penguin and Lana the kangaroo can't allow that! So it is fitting that Lana finds a mysterious map in her pouch. Is it possible that there is a valuable treasure hidden somewhere in the zoo? Finally the four friends go on a quest together ...

The Secret Treasure in the Zoo
ISBN 978-3-12-949518-6

The Crazy Monkey Taxi

At Glücksstadt Zoo a food delivery failed to appear. Anton the monkey wants his delicious bananas back at last and decides to obtain the food himself. Together with his friends he runs away. Kim the penguin is able to start an old jeep with the help of his magic power to invent. The crazy search for food starts with a break-neck speed ...

The Crazy Monkey Taxi
ISBN 978-3-12-949481-3

Small Giraffe in Great Danger

One evening the lion Erik hears some footsteps in the zoo. Together with his three friends he gets to the bottom of the puzzle: The door of the enclosure of the giraffes is open and the baby giraffe is missing! Where did it get lost? The friends start a scavenger hunt with the help of Erik's good ears ...

Small Giraffe in Great Danger
ISBN 978-3-12-949484-4

The Wrong Wizard

Kim the penguin found a puzzling envelope in his enclosure. As he opens it, he scarcely believes his senses! An abduction in Glücksstadt? The rabbit Hugo in danger? From that moment on there starts a rapid search for Kim and his friends. The tracks lead to Master Simsalä ...

The Wrong Wizard

PONS The Big Exercise Book

For 1st to 4th grade

- Complete knowledge: practice everything that is important for maths with exciting topics. From basic arithmetic operations, sizes and charts to geometry and problem solving
- Portioned: clear structured, motivating learning portions
- Understand fast: The most important rules and related game ideas and tips
- Many advice pages: solution strategies for word problems and attention exercises for successful learning

LOWER SECONDARY

36 Ionenbindung und Ionenkristalle

Kennzeichen der Ionenbindung

Hier geht's zum passenden Lern-Video.

Ionenverbindungen bezeichnet man auch als Salze. Sie entstehen häufig aus der Reaktion von Elementen: Metall + Nichtmetall → Salz.

Beispiel: Kochsalz
Alle Salze sind mittels Ionenbindung aufgebaut. Ein bekannter Vertreter ist Kochsalz, chemische Bezeichnung Natriumchlorid, ein Metallhalogenid. Da den beteiligten Elementen Natrium Na und Chlor Cl in der Formel NaCl keine tiefgestellten Zahlen („Indices“, Plural „Indices“) folgen, bedeutet dies, dass für eine Einheit Natriumchlorid eine Einheit Natrium und eine Einheit Chlor benötigt wird. Man könnte auch Na₁Cl₁ schreiben, lässt der Einfachheit halber aber bei der Anzahl „1“ die Zahl weg.

Elektronenbetrachtung von NaCl
Natrium hat ein einziges Elektron auf der Außenschale, es steht in der ersten Hauptgruppe des Periodensystems der Elemente. Chlor hingegen steht in der siebten Hauptgruppe und weist demzufolge sieben Valenzelektronen auf. Bei Natriumchlorid hat das Natriumatom sein einziges Valenzelektron an das Chloratom abgegeben: Dadurch wird es zu einem einfach positiv geladenen Ion, während das entstandene Chlorion einfach negativ geladen ist. Diese Ionen ziehen sich an.

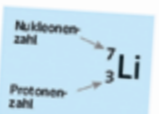

$$\text{Na} \cdot + \cdot \ddot{\text{Cl}} \cdot \rightarrow \text{Na}^+ \cdot \ddot{\text{Cl}}:^-$$

Matching instructional videos explain difficult topics

Atombau 27

Kennzeichnung
Um Atome genau zu beschreiben, gibt es einige Kennzeichnungsmöglichkeiten.

Atomkern
Um den Atomkern genau zu beschreiben, gibt man die Protonen- und die Nukleonenzahl sowie die Elementkürzschrift an.

Da die Nukleonenzahl die Summe aus Protonen und Neutronen ist, subtrahiert man einfach die kleinere von der größeren Zahl, um die Anzahl der Neutronen zu erhalten. In diesem Beispiel hat das Lithiumatom also drei Protonen und vier Neutronen.

Atom
Ein Atom ist gekennzeichnet durch die Ordnungszahl und seine Masse, die sogenannte Atommasse. Die Atommasse lässt sich durch die Summe von Protonen und Neutronen errechnen. Die Ordnungszahl entspricht der Anzahl der Protonen und ist für ein Element eine feste Größe. Bei Elementen mit mehreren Isotopen (Mischelemente) ist die in Nachschlagewerken angegebene Atommasse der Mittelwert der einzelnen Isotope unter Einbeziehung ihrer Häufigkeit.

Beispiel:
Lithium hat die Ordnungszahl (Protonenzahl) 3, die Atommasse beträgt etwa 7 u. Der genaue Wert ist 6,941 u, da es einen kleinen Anteil des Isotops mit drei und einen viel größeren mit vier Neutronen gibt.
